

## DERMATOLOGY BILLING CODES DECODED A QUICK REFERENCE GUIDE

Experience a smoother approach to dermatology medical billing and coding with BillingFreedom!

Our guide streamlines your dermatology medical billing processes, which will help you maximize efficiency and minimize denials.

### Skin Biopsy CPT Codes

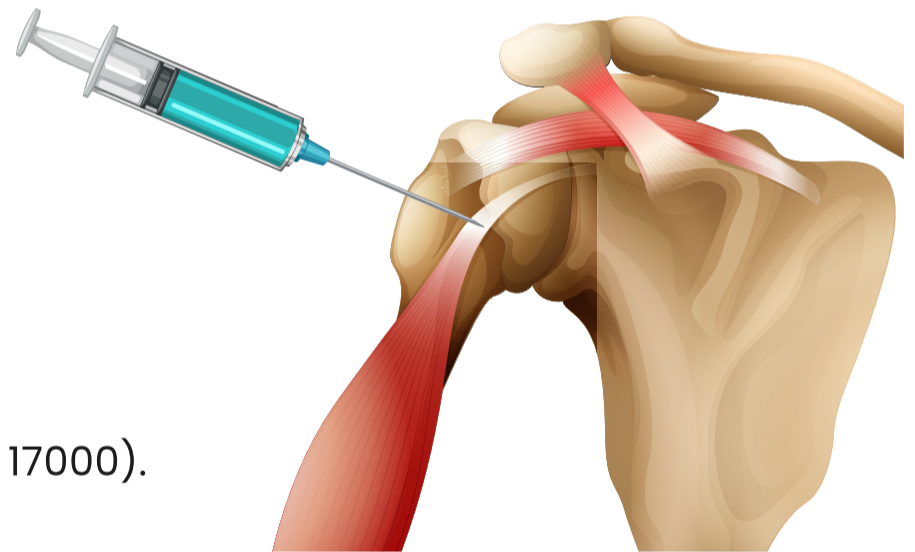

For accurate billing of skin biopsies, the following codes are commonly used:

- 11102: Tangential biopsy of a single lesion.
- 11103: Tangential biopsy for each additional lesion.
- 11104: Punch biopsy of a single lesion.
- 11105: Punch biopsy for additional lesions.

### Lesion Removal Codes

Lesions, whether benign or malignant, require specific codes for various removal techniques:

- 17000: Destruction of premalignant lesions, first lesion.
- 17003: Each additional premalignant lesion (used with 17000).

### Complete Skin Exam Coding

A full skin exam can typically be coded as 99214 if comprehensive criteria are met, including physical exam elements and history requirements.

- 11400-11446 - Excision of malignant skin lesions
- 11300-11313 - Excision of benign skin lesion.
- 17110-17111 - Destruction of skin lesions.
